

WORKSHEETS (LEMBAR KERJA)

Mata Kuliah	: Anatomi
Materi	: Musculoskeletal
NIM/Nama Mahasiswa	: 2160101051 / Tjanya Promudyaning Sumantri

No	Keterangan	Pembahasan														
1	Jumlah tulang manusia 206.. Tulang, saling berhubungan. Terdiri atas 1) Tulang tengkorak /cranium 8 buah. 2) Tulang belakang (vertebrae) 2) Tulang wajah 14 buah. dan pelvis 26 buah. 3) Tulang tulang dalam 6 buah. 7) Tulang ekstremitas atas 64 buah 4) Tulang lidah 1 buah. 8) Tulang ekstremitas bawah 5) Tulang dada 26 buah. 62 buah.															
2	Jelaskan klasifikasi Tulang menurut bentuknya berada di cranium/ kepala	1. osa longa (tulang panjang). - tulang yg ukurannya panjangnya tubular. ex: os humerus. 2. osa brevia (tulang pendek). - tulang yg ukurannya kira-kira sama besar. ex: os carpis, (gelangan tangan). 3. osa plana (tulang pipih). - tulang yg ukurannya lebarnya besar. ex: os palatini. 4. osa irregular (tulang yg bukan rata). ex: os sphenoideum. 5. osa pneumatica (tulang berengsel udara) ex: os maxilla.														
3	Sistem skeletal	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th>Axial skeleton 86 tulang</th> <th>Appendicular skeleton 63 tulang</th> </tr> </thead> <tbody> <tr> <td>• Cranium /skull</td> <td>- vertebrae.</td> <td>- Supporting bone (supra & cellular bone)</td> </tr> <tr> <td>• Sternum</td> <td>- Sacrum</td> <td>- Extremities bone (upper limb bone)</td> </tr> <tr> <td>• Ribs /costae</td> <td></td> <td>- Hip (supporting bone).</td> </tr> <tr> <td></td> <td></td> <td>- Lower limb bone (anggota gairi bawah).</td> </tr> </tbody> </table>	Axial skeleton 86 tulang	Appendicular skeleton 63 tulang	• Cranium /skull	- vertebrae.	- Supporting bone (supra & cellular bone)	• Sternum	- Sacrum	- Extremities bone (upper limb bone)	• Ribs /costae		- Hip (supporting bone).			- Lower limb bone (anggota gairi bawah).
Axial skeleton 86 tulang	Appendicular skeleton 63 tulang															
• Cranium /skull	- vertebrae.	- Supporting bone (supra & cellular bone)														
• Sternum	- Sacrum	- Extremities bone (upper limb bone)														
• Ribs /costae		- Hip (supporting bone).														
		- Lower limb bone (anggota gairi bawah).														
4	Jelaskan fungsi sendi dan contohnya	<p>- fungsi : menghubungkan dua tulang, memberi struktur, juga membantuu otot untuk mempergerakkan tulang.</p> <p>- Contoh :</p> <ul style="list-style-type: none"> 1) sinartrosis = sendi penghubung tulang tengkorak. 2) amphiarthrosis / sendi tulang rawan : sendi di antar tulang bukan. 														
5	<p>Cranium</p> <p>Frontal bone</p> <p>Parietal bone</p> <p>Temporal bone</p> <p>Occipital bone</p> <p>Sphenoid bone</p> <p>Ethm. bone</p>	<p>cranial bones</p> <p>facial bones</p>														

8 Cranial Bones

No	Keterangan	Pembahasan
	 <p>Lateral (Side) Spinal Column Posterior (Back) Spinal Column</p> <ul style="list-style-type: none"> Cervical curvatures Thoracic curvatures Lumbar curvatures Sacral curvatures Coccyx 7 cervical vertebrae 12 thoracic vertebrae 5 lumbar vertebrae 5 sacrum Coccyx 	
	 <p>Sacrum</p> <ul style="list-style-type: none"> Body of sacrum Superior articular process. Aja (wing). Lumbosacral articular surface Sacral promontory Dorsal sacral foramina Apex of sacrum Transverse process of coccyx Coccyx <p>Anterior view</p>  <ul style="list-style-type: none"> Superior articular facet Sacral canal Aja Spinal tubercles Coccyx Dorsal sacral foramina Sacral hiatus <p>Posterior view</p>	

No	Keterangan	Pembahasan
	<p>Pectoral/shoulder girdle</p>	
	<p>Upper limb bones</p>	
	<p>Hip/pelvis</p>	<p>Os coxae terdiri dari os ilium, os ischium, dan os pubis,...</p>

No	Keterangan	Pembahasan
os coxae lateral view.	<p>A. Ilium B. Gluteal line C. Greater sciatic notch D. Ischial tuberosity E. Ischial ramus F. Obturator foramen G. Inferior ramus of pubis H. Pubis I. Acetabulum J. Anterior inferior iliac spine K. Superior iliac crest L. Line M. Iliac crest N. Ilium</p>	<p>Posterior gluteal line anterior K superior iliac line anterior inferior iliac spine acetabulum Public tubercle Pubis. inferior ramus of pubis. Ilium superior ramus of pubis Public tubercle Ilium obturator foramen.</p>
Lower limb bones	<p>Acetabulum Head of femur Neck Greater trochanter. Lesser trochanter Femur Patella Head of fibula Fibula Medical condyle Tibia.</p> <p>7. Tarsals 5. Metatarsals 14. Phalanges</p>
