$$1. \text{Rasio Likuiditas} = C.R = \frac{\text{Aktiva lancar}}{\text{Utang lancar}} \times 100\% = \frac{7.539}{3.400} \times 100\% = 221,73\%$$

$$C.R = \frac{\text{A. lancar} - \text{Persediaan}}{\text{Utang lancar}} = \frac{7.539 - 2.623}{3.400} \times 100\% = \frac{4.916}{3.400} \times 100\% = 144,58\%$$

$$2. \text{Rasio Aktivitas} = P.T = \frac{\text{Penjualan}}{\text{Perputaran Kewang}} = \frac{16.405}{7.353} \times 100\% = 376,86\%$$

$$I.T = \frac{\text{HPP}}{\text{Perputaran Persediaan}} = \frac{10.492}{16.405} \times 100\% = 63,95\%$$

$$A.T = \frac{\text{Penjualan}}{\text{Aset Aktiva}} = \frac{16.405}{12.638} \times 100\% = 129,19\%$$

3. Rasio Solabilitas

$$D.T.A.R = \frac{\text{total hutang}}{\text{total aset}} = \frac{(3.400 + 4.945)}{12.638} = \frac{8.345}{12.638} \times 100\% = 65,91\%$$

$$TIB = \frac{1473}{303} = 4.861 \times 100\% = 486,13\%$$

$$F.C.L = \frac{\text{GBIT} + \text{Biaya sewa}}{\text{biaya} + \text{biaya sewa}} = \frac{1473 + 109}{303 + 109} = \frac{1.662}{492} \times 100\% = 337,80\%$$

4. Rasio Profitabilitas

$$P.M = \frac{\text{keuntungan bersih}}{\text{Penjualan}} = \frac{802}{16.405} = 4,88\%$$

$$R.OA = \frac{802}{12.638} = 0,0631 \rightarrow 6,31\%$$

$$R.OE = \frac{802}{\text{total ekuitas}} = \frac{802}{4353} = 18,4\%$$
