

WORKSHEETS (LEMBAR KERJA)

Mata Kuliah	: Anatomi
Materi	: Anatomi Syaraf
NIM/Nama Mahasiswa	: 2110101122/Novia Indri Lestari

No	Keterangan	Pembahasan
1	<p>Pembagian sistem syaraf :</p> <p>a) Susunan syaraf pusat : Terdiri dari otak dan sum-sum tulang belakang</p> <p>b) Susunan syaraf perifer : Terdiri dari sel-sel yang membawa informasi ke (sel saraf sensorik) dan dari (sel saraf motoric) sistem saraf pusat (SSP), yang terletak diluar otak dan sum-sum tulang belakang.</p> <p>Sebutkan 2 jenis sel pembangun sistem persyarafan :</p> <ul style="list-style-type: none"> - Sel neuron -Sel glia 	
	<p>Otot terdiri dari Otak tengah, Pons dan Medula oblongata 4 lobus pada cerebrum adalah Lobus frontal, Lobus oksipital, Lobus temporal, dan Lobus parietal</p>	

No	Keterangan	Pembahasan
		 <p>Central sulcus Lobus frontalis Hipotalamus Lobus temporalis Ponds varolii Lobus parientalis Talamus Lobus okpitalis Diensefalon Serebelum Medula oblongata</p>
		 <p>Duramater Arachnoid Piamater Otak</p>
	Lobus otak	 <p>Lobus frontal Lobus parietal Lobus opicital Lobus temporal Ecdyng</p>

No	Keterangan	Pembahasan
	 <p>The diagram illustrates the human nervous system. It shows the brain at the top, connected to the spinal cord via the brainstem. The spinal cord is depicted as a vertical column of nerves descending through the spine. Various peripheral nerves branch off from the spinal cord to different parts of the body. Labels with arrows point to specific components:</p> <ul style="list-style-type: none"> Sistem syaraf kepala (kranial): Labels the brain and the brainstem. Saraf leher (8 pasang): Labels the cervical plexus, which branches off the spinal cord at the neck level. Saraf punggung (12 pasang): Labels the dorsal root ganglia, which are located along the length of the spinal cord. Saraf pinggang (5 pasang): Labels the lumbar plexus, which branches off the spinal cord in the lower back area. Saraf pinggul /sacral (4 pasang): Labels the sacral plexus, which branches off the spinal cord near the sacrum. Saraf ekor (1 pasang): Labels the coccygeal plexus, which branches off the very bottom of the spinal cord. Sistem saraf tulang belakang (spinal): Labels the entire network of nerves originating from the spinal cord, collectively known as the peripheral nervous system.
