No	Keterangan	Pembahasan
1	<p>An anatomical diagram of the human respiratory system. It shows the nasal cavity leading to the pharynx, which branches into the trachea (windpipe) and the esophagus. The trachea leads to the bronchi, which further divide into bronchioles and finally reach the lungs (paru-paru). The left lung (paru-paru kiri) is shown with its characteristic lobes. The pleura is the membrane surrounding the lungs, and the diaphragm is the muscular partition separating the thoracic and abdominal cavities.</p>
