	 <p>A hand-drawn diagram of the human large intestine (colon) and rectum. The diagram shows the characteristic shape of the large intestine, including the ascending colon on the right, the transverse colon at the top, and the descending colon on the left. A vermiform appendix is shown extending from the junction of the ascending and transverse colons. The rectum is shown at the bottom right. Labels are written in black ink and enclosed in small rectangular boxes, with lines pointing to the corresponding parts of the diagram.</p>
